

Farm Organism

Biodynamic Training

**We offer a 2-year,
NQF 5 AgriSeta Diploma**

Our phenomenological approach to the farm organism is central to our climate smart training. Through this on-farm training we aim to include a diverse racial and economic group – addressing the aspirations of the youth to create a new agriculture based on ecological land management.

We invite interested farmers and prospective students throughout South Africa to contact: training@bdaasa.org.za for a Prospectus.
